Panel Notes:

- With this 24 GA, 16" wide panel, you may opt to use heavier gauge coil and narrower width panels. Fastener spacing will not change.
- Maximum coil width for engineered systems is 24."
- This panel uses 4-1/16" of material to form the panel.
- Divide the coil width by the panel width to determine your roof multiplier. Take the square footage of the roof and multiply that by the roof multiplier to determine the amount of coil needed to manufacture the panels. This does not include estimated waste.
- This panel is NOT approved for Weathertight Warranties.
