

## DIVISION 7

# YOUR ONE SOURCE FOR STANDING SEAM METAL ROOF & WALL SOLUTIONS

- Engineered Metal Roof & Wall Systems
- Specialty Coil & Sheet Products
- Rollforming Equipment
- Architectural Support
- Weathertight Warranties
- Accessories & Components

## WHY SHEFFIELD METALS?

Sheffield Metals International (SMI) is a leader in the distribution of coated and bare metal products, as well as Engineered Standing Seam Metal Roof and Wall Systems (**noted with an E in section headings**). We specialize in providing painted Galvalume® and aluminum for the architecturally driven metal panel industry.

Sheffield Metals utilizes manufacturers of our metal roof and wall systems throughout the country. We are able to provide the complete package and support our customers continually throughout the most complicated projects.

### SHEFFIELD METALS OPERATES OUT OF SEVEN FACILITIES:

- Atlanta, Georgia
- Chicago, Illinois
- Cleveland, Ohio
- Dallas, Texas
- Denver, Colorado
- Los Angeles, California
- Tampa, Florida

Sheffield Metals has you covered from coast to coast!

### SMI PROVIDES:

More than 50 colors continuously stocked in Galvalume® and many popular colors in aluminum sheet and coil

Color matching for virtually any custom color

Value-added services: slitting, cut-to-length, applying strippable PVC, and re-rolling

Service to the entire geographic United States, including Alaska, Hawaii, and the Caribbean

Products that meet CRRC or LEED requirements

Galvalume® and aluminum products for LEED sustainability and beyond

Full-time, in-house Technical and Architectural Departments

Transferrable 40-year PVDF paint, 40-year SMP and optional 5- to 35-year weathertight warranties

# WARRANTIES & LEAD TIMES

## PREMIUM QUALITY

Our engineered systems have been designed to meet current industry standards and can perform on projects small or large no matter the performance requirements.

## INDUSTRY-LEADING WARRANTIES

Guarantee the longevity of your metal roof or wall system with our various paint, substrate, and weathertight warranty options.

## 50+ COLORS

Sheffield Metals stocks over 50 colors of metal roofing and siding materials, enabling customers to satisfy their aesthetic preferences and project requirements.

Sheffield Metals knows that your roof not only protects your family or business, but also keeps your most valuable and often irreplaceable assets safe. That's why we work closely with our chain of suppliers to ensure that we are able to continually offer the best products available.

To complement our metal roof and wall systems, we offer 40-year paint finish warranties for both PVDF and SMP coatings, substrate warranties for AZ55 and AZ50 Galvalume® products, and Limited and No Dollar Limit weathertight

warranties with standard timeframes starting at 5 years through 35 years. All warranty projects are coordinated through our in-house Technical Department, who ensure that all applicable requirements are met and inspect each project personally. Our use of knowledgeable contractors, time tested installation details, and close company involvement deliver the highest quality installation available.

Our warranties are fully transferable and designed to offer comprehensive protection to fit any budget or criteria.

Contact a Sheffield representative today to learn more about a warranty that's right for you.

# PAIN**T**, SUBSTRATE, AND WEATHER**T**IGHT WARRANTIES

At Sheffield Metals, we take our warranties seriously, especially when it comes to something as important as the integrity of the metal roof and wall systems that utilize our metal products.

That's why we've invested time and money into testing our products to ensure that we meet or exceed the terms of the warranties we offer. Sheffield Metals offers paint, substrate, and weathertight warranties in various durations to ensure that your projects stand the test of time.

A paint warranty is a guarantee from a manufacturer/paint supplier that the paint system applied to the metal substrate will not degrade to a certain degree within a specific time frame. Warranties on substrates guarantee that the base metal (that a paint system is applied to) will not corrode due to rupture, fail structurally, or perforate within the specified terms when exposed to normal atmospheric conditions. Weathertight warranties guarantee from the installer and roofing manufacturer that the roof installed on a commercial structure will remain weathertight for the duration of the warranty.

## OUR PAINT WARRANTIES

- 40-Year PVDF (Kynar®) Paint
- 40-Year WeatherX Paint
- 35-Year Weathered Series Paint
- 25-Year Coastal PVDF (Kynar®) Paint
- 20-Year Caribbean PVDF (Kynar®) Paint

## OUR SUBSTRATE WARRANTIES

- 50-Year AZ50 Galvalume®
- 45-Year AZ55 Acrylic-Coated Galvalume®

## OUR WEATHER**T**IGHT WARRANTIES

- 5-Year Limited & No Dollar Limit
- 10-Year Limited & No Dollar Limit
- 15-Year Limited & No Dollar Limit
- 20-Year Limited & No Dollar Limit
- 25-Year Limited & No Dollar Limit
- 30-Year Limited & No Dollar Limit
- 35-Year Limited & No Dollar Limit

# PRODUCTS

## COOLR®

COOLR® is a family of sustainable, energy efficient roofing products which meet LEEDv4.1 compliance with many of our paint finishes. COOLR® is available in a wide variety of colors, gauges, widths, and substrates for low and steep slope applications.

## ARCHITECTURAL SHEET METAL

Sheffield Metals is a leader in the distribution of coated coil and sheet products for the metal roofing, walls, and architectural sheet metal industry. Our architectural metal products are produced from full prime Galvalume®, Acrylic Coated Galvalume®, and Aluminum substrates. Our products are coated with Valspar's Fluoropon, a high performance Kynar 500® or Hylar 5000® based resin coating. Sheffield Metals stocks more than 50 colors and has the ability to custom paint virtually any color to suit a particular project.

## ENGINEERED METAL ROOF & WALL SYSTEMS

Whether your project is residential or commercial, solid substrate or open framing, Sheffield Metals offers a complete line of Engineered Standing Seam Metal Roof and Wall Systems and related accessories to meet your needs. With panel profiles meeting industry standards, let Sheffield Metals provide you with a quality product that's been tested to last. We offer FBC and TDI approved profiles as well.

## COMPONENTS & ACCESSORIES

Sheffield Metals offers a complete line of accessories that are incorporated into your architectural and engineered metal roofing systems. We stock underlayment, sealant, butyl tape, clips, corrosion resistant and painted fasteners to match all of our finishes at our locations.

## COMMERCIAL ROOF GUTTER & DOWNSPOUT PRODUCTS

We offer a complete line of commercial roof drainage systems from Roof Drainage Accessories & Components, Inc. With more than 2,500 components and accessories, our systems are custom made per customer specifications in over 200 colors and 16 different material substrates.

## ROLLFORMERS & SHEET METAL FABRICATION EQUIPMENT

Sheffield Metals is also a trusted distributor of several sheet metal manufacturing machines, including portable rollforming machines by New Tech Machinery (NTM), as well as hydraulic shears and folders. NTM's portable roof panel, wall panel, and gutter machines are recognized as the world's finest portable rollformers. Sheffield Metals' coils are compatible with New Tech Machinery equipment and produce outstanding finished panels.

# SERVICES

## ARCHITECTURAL DEPARTMENT

Our Architectural Department is here to assist you as you move your clients through the design process. This may include choosing the appropriate standing seam profile and accompanying deck assembly, to reviewing your project drawings at any stage to confirm that our panel's capabilities are compliant with the project performance requirements, to guiding you through material choices: Galvalume or aluminum, copper, stainless steel, and zinc. The Technical Department also serves as a resource for any clients who are uncertain about metal and would benefit from a Sheffield-specific presentation.

## TECHNICAL DEPARTMENT

We understand your technical needs, which is why we have a full-time Technical Department to assist you with your standing seam metal roofing projects. This team is comprised of individuals who have worked in their respective fields installing, designing, and inspecting metal roof and wall systems.

## TAKE-OFF SERVICES

Sheffield Metals offers a high-quality and professional take-off service to make sure you are submitting the most accurate numbers possible. Typical turnaround is 24 to 48 hours. Simply provide us with panel width, digital blueprints/roof plans, and roof pitch! Contact us for requirements if no digital drawings are available.

## SMI TECH STICK

Our Tech Stick offers contractors, architects, and specifiers easy access to all of our engineering reports, product information, manuspecs, take-off services, and more. The Tech Stick simplifies the submittal process for contractors and helps streamline the design. All of this is available without a log-in on the Tech Stick and our website.

## CONTINUING EDUCATION COURSES

Our CE program is available via face-to-face presentations, virtual webinars, or as an e-learning experience on our website. We offer one-hour programs, as well as a selection of six 15-minute nano courses, providing multiple options for those interested in furthering their knowledge of architectural metal: the materials, the exterior cladding applications, and affirming metal's sustainable qualities.

## COLOR VISUALIZER

The Sheffield Metals Color Visualizer allows you to create detailed digital mock-ups of roofing, wall, and trim projects. You can choose from one of the sample pictures provided in the tool, or upload a photo of your actual home, business, or building. From there, select from a wide variety of Sheffield Metals' product options, including seam types, profiles, thicknesses, and colors, and apply each one to the defined roof, wall, and trim areas of the photo.

# SMI 1.0" FF SNAPLOCK PANEL PROFILE

## PANEL INFORMATION

<b>Panel Type</b>	Standing Seam
<b>Panel Seam</b>	SnapLock
<b>Panel Width</b>	16"
<b>Seam Height</b>	1.0"
<b>Panel Material</b>	22 ga—24 ga min.
<b>Panel Surface</b>	Smooth / Embossed Optional
<b>Panel Clip</b>	None
<b>Minimum Slope</b>	3/12
<b>Substrate</b>	Plywood

## PANEL TESTING

<b>Uplift Resistance</b>	UL 90
<b>Hail Rating</b>	Class 4 Impact UL 2218
<b>Fire Rating</b>	UL Class A
<b>Texas Department of Insurance Approval</b>	RC-560

## PANEL NOTES

With this 24 GA, 16" wide panel, you may opt to use heavier gauge coil and narrower width panels. Fastener spacing will not change.

This panel uses a 20" coil. Maximum width coil of 24".

This panel uses 4-1/16" of material to form the panel.

Divide the coil width by the panel width to determine your roof multiplier. Take the square footage of the roof and multiply that by the roof multiplier to determine the amount of coil needed to manufacture the panels. This does not include estimated waste.

This panel is NOT approved for Weathertight Warranties.

# SMI 1.0" MECHANICAL SEAM PANEL PROFILE

## PANEL INFORMATION

<b>Panel Type</b>	Standing Seam
<b>Panel Seam</b>	Mechanical
<b>Panel Width</b>	17"
<b>Seam Height</b>	1.0"
<b>Panel Material</b>	22 ga—24 ga min
<b>Panel Surface</b>	Smooth / Embossed Optional
<b>Minimum Slope</b>	3/12

## PANEL TESTING

<b>Uplift Resistance</b>	UL 580, UL 1897, UL 90
<b>Hail Rating</b>	Class 4 Impact UL 2218
<b>Fire Rating</b>	UL Class A

## PANEL NOTES

This panel uses a 20" coil. Maximum width coil of 20".

This panel uses 3" of material to form the panel.

Divide the coil width by the panel width to determine your roof multiplier. Take the square footage of the roof and multiply that by the roof multiplier to determine the amount of coil needed to manufacture the panels. This does not include estimated waste.

Suitable for zinc and copper.

# SMI 1.5" FF SNAPLOCK PANEL PROFILE

## PANEL INFORMATION

<b>Panel Type</b>	Standing Seam
<b>Panel Seam</b>	SnapLock
<b>Panel Width</b>	14.75"
<b>Seam Height</b>	1.5"
<b>Panel Material</b>	22 ga–24 ga min
<b>Panel Surface</b>	Smooth / Embossed Optional
<b>Panel Clip</b>	None
<b>Minimum Slope</b>	3/12
<b>Substrate</b>	Plywood

## PANEL NOTES

This panel uses a 20" coil.

This panel uses 5-5/16" of material to form the panel.

Divide the coil width by the panel width to determine your roof multiplier. Take the square footage of the roof and multiply that by the roof multiplier to determine the amount of coil needed to manufacture the panels. This does not include estimated waste.

This panel is NOT approved for Weathertight Warranties.

## PANEL TESTING

<b>Hail Rating</b>	Class 4 Impact UL 2218
<b>Fire Rating</b>	UL Class A

## PANEL INFORMATION

<b>Panel Type</b>	Standing Seam
<b>Panel Seam</b>	Mechanical
<b>Panel Width</b>	16"
<b>Seam Height</b>	1.5"
<b>Panel Material</b>	22 ga–24 ga min, .032–.040
<b>Panel Surface</b>	Smooth / Embossed Optional
<b>Panel Clip</b>	Required Per Engineering
<b>Minimum Slope</b>	2/12
<b>Substrate</b>	Plywood, B-Deck, B-Deck w/ISO

## PANEL TESTING

<b>Uplift Resistance</b>	UL 580, UL 1897, UL 90
<b>Air Infiltration</b>	ASTM E 1680
<b>Wind Driven Rain</b>	TAS 100
<b>Water Penetration</b>	ASTM E 1646
<b>Water Submersion</b>	ASTM E 2140
<b>Hail Rating</b>	Class 4 Impact UL 2218
<b>Fire Rating</b>	UL Class A
<b>Texas Department of Insurance Approval</b>	RC-386*, RC-395*, RC-397*
<b>FBC HVHZ &amp; Non-HVHZ Approval</b>	FL18316

## PANEL NOTES

With this panel engineering, you may opt to use heavier gauge coil and narrower width panels. Clip spacing will not change.

For slopes lower than a 2/12 roof pitch, contact SMI Technical Department for further installation direction and requirements.

This panel uses a 20" coil. Maximum width coil of 20".

This panel uses 4" of material to form the panel.

Divide the coil width by the panel width to determine your roof multiplier. Take the square footage of the roof and multiply that by the roof multiplier to determine the amount of coil needed to manufacture the panels. This does not include estimated waste.

This panel is approved for Weathertight Warranties.

\* Available in steel only.

# SMI 1.5" SNAPLOCK 450 PANEL PROFILE

## PANEL INFORMATION

<b>Panel Type</b>	Standing Seam
<b>Panel Seam</b>	SnapLock
<b>Panel Width</b>	16"
<b>Seam Height</b>	1.5"
<b>Panel Material</b>	22 ga—24 ga min.
<b>Panel Surface</b>	Smooth / Embossed Optional
<b>Panel Clip</b>	Required Per Engineering
<b>Minimum Slope</b>	3/12
<b>Substrate</b>	Plywood

## PANEL TESTING

<b>Uplift Resistance</b>	UL 580, UL 1897, UL 90
<b>Hail Rating</b>	Class 4 Impact UL 2218
<b>Fire Rating</b>	UL Class A
<b>Texas Department of Insurance Approval</b>	RC-561

## PANEL NOTES

With this 24 GA, 16" wide panel engineering, you may opt to use heavier gauge coil and narrower width panels. Clip spacing will not change.

This panel uses a 20" coil.

This panel uses 4-1/8" of material to form the panel.

Divide the coil width by the panel width to determine your roof multiplier. Take the square footage of the roof and multiply that by the roof multiplier to determine the amount of coil needed to manufacture the panels. This does not include estimated waste.

This panel is approved for Weathertight Warranties.

# SMI 1.5" SNAPLOCK 450 PLUS PANEL PROFILE

## PANEL INFORMATION

<b>Panel Type</b>	Standing Seam
<b>Panel Seam</b>	SnapLock
<b>Panel Width</b>	16"
<b>Seam Height</b>	1.5"
<b>Panel Material</b>	22 ga—24 ga min.
<b>Panel Surface</b>	Smooth / Embossed Optional
<b>Panel Clip</b>	Required Per Engineering
<b>Minimum Slope</b>	3/12
<b>Substrate</b>	Plywood

## PANEL TESTING

<b>Uplift Resistance</b>	UL 90
<b>Hail Rating</b>	Class 4 Impact UL 2218
<b>Fire Rating</b>	UL Class A
<b>Texas Department of Insurance Approval</b>	RC-564

## PANEL NOTES

With this 24 GA, 16" wide panel engineering, you may opt to use heavier gauge coil and narrower width panels. Clip spacing will not change.

This panel uses a 20" coil.

This panel uses 4-1/8" of material to form the panel.

Divide the coil width by the panel width to determine your roof multiplier. Take the square footage of the roof and multiply that by the roof multiplier to determine the amount of coil needed to manufacture the panels. This does not include estimated waste.

This panel is approved for Weathertight Warranties.

# SMI BOARD & BATTEN WALL PANEL PROFILE

## PANEL INFORMATION

<b>Panel Type</b>	Wall
<b>Panel Width Minimum</b>	12" Nominal
<b>Seam Height</b>	3/4"
<b>Mounting Orientation</b>	Vertical
<b>Materials Formed</b>	22 and 24-gauge steel

## PANEL TESTING

<b>Structural Performance</b>	ASTM E 330
-------------------------------	------------

## PANEL NOTES

This panel uses a 3-5/8" of material to form the panel.

1" x 1/4" slots are equally spaced every 6-3/8."

Striations or ribs may be needed for panels wider than 12" coverage to avoid oil canning.

# E WAV-16-4F & WAV-16-4C PROFILES

WAV WALL PANEL MACHINE

WAV-16-4F

WAV PANEL & CLIP

WAV-16-4C

The WAV profile is well-suited for a variety of architectural market segments, including retail, hospitality, residential mixed-use, independent living, sports centers, municipal, and interior design.

## PANEL TESTING

<b>Structural Performance</b>	ASTM E 330
<b>Air Infiltration</b>	ASTM E 283
<b>Water Penetration</b>	ASTM E 331

## PANEL INFORMATION

<b>Panel Type</b>	Wall
<b>Rib Height</b>	7/8"
<b>Panel Material</b>	22 ga—24 ga min.
<b>Panel Surface</b>	Smooth / Embossed Optional

## PANEL NOTES

The **WAV-16-4F** uses 24 or 22 Ga. with a 24" wide stretch out for a finished panel width of 16". The concept here is similar to that of a fastener flange. When using this option, we recommend that panel lengths stay at 25' or less. The SMI WAV with Flange (F) was tested in accordance with ASTM E 330 and ASTM E 283 / E 331 standards.

The **WAV-16-4C** uses 24 or 22 Ga. with a 22-1/4" wide stretch out for a finished panel width of 16". This panel uses a clip or a cleat (C) that allows for expansion and contraction of the wall system. The SMI WAV was tested in accordance with ASTM E 330 and ASTM E 283 / E 331 standards.

<b>Air Infiltration</b>	ASTM E 283
<b>Water Penetration</b>	ASTM E 331

## NET FREE AIR SPACE

## PANEL NOTES

This panel uses a 16" coil.

This panel uses 4" of material to form the panel.

If you take the square footage of the wall and multiply that by 1.25, the total will be the amount of coil needed to manufacture the panels.

Perforation opening size .50 [12.7] X .12 [3.0] = .06 Sq. In. [38.7 sq. mm.]

Openings per 12 inch length [304.8mm] = 51.25

Net Free Area / 12 inch = .06 Sq. In. X 51.25 = 3.08 Sq. In. [Net Free Area 1304.8mm = 38.7 sq. mm X 51.25 = 1983 sq. mm]

<b>Seam Height</b>	1.5"
<b>Panel Material</b>	22 ga—24 ga min
<b>Panel Surface</b>	Smooth / Embossed Optional

## NET FREE AIR SPACE

## PANEL NOTES

This panel uses a 17" coil, which produces a 12" panel.

This panel uses 5" of material to form the panel.

Divide the coil width by the panel width to determine your roof multiplier. Take the square footage of the roof and multiply that by the roof multiplier to determine the amount of coil needed to manufacture the panels. This does not include estimated waste.

Minimum panel width is 12".

Oil canning is an aesthetic issue and is an inherent part of light gauge cold formed metal products. By using coil that has been processed properly, designing for thermal movement, following stringent specifications for installation, and proper handling, most oil canning can be minimized. Oil canning is not grounds for coil/panel rejection.

## NOTES

- All of Sheffield's CoolR® metal is painted with a .20 mil primer and .70 - .90 mil Top Coat of 70% PVDF resin-based coating. The reverse side has a .20 primer and .30 - .40 backer coating.
- For low slope roofing to meet LEED V4.1 requirements, the initial SRI must be ≥ 82 OR the 3-year SRI must be ≥ 64. For steep slope roofing to meet LEED V4.1 requirements, the initial SRI for 75% of the roof must be ≥ 39 OR the 3-year SRI must be ≥ 32.
- Low slope is defined as ≤ 2:12. Steep slope is defined as > 2:12.
- Materials should be stored in a cool, dry place. Materials with PVC film on project sites should be used immediately or stored in a climate-controlled setting. PVC film must be removed prior to installation.
- Anything not noted in the Availability Matrix can be painted, regardless of width, substrate, or thickness; however, it would be subject to a minimum paint run and would need to meet standard custom order criteria.

## KEY

Colors shown are matched as accurately as possible, but may vary slightly from the finished product. These rich and vibrant colors are produced with PVDF resins, which provide superior color retention and allow Sheffield Metals to offer non-prorated coating warranties for most applications. Galvalume® is a registered trademark of BIEC International Inc. Coating warranty varies for CoolR® Moonstone, Matte Black, Copper, Champagne, Silver, and Pre-Weathered Galvalume. Steelscape's Vintage carries a 20-year Finish Warranty. Please contact your representative for more information. Touch-up should only be done with a Sheffield Metals color-matched PVDF air-dry paint pen.

Colors shown are matched as accurately as possible, but may vary slightly from the finished product. These rich and vibrant colors are produced with PVDF resins, which provide superior color retention and allow Sheffield Metals to offer non-prorated coating warranties for most applications.

We carry an extensive inventory of painted aluminum and Galvalume® (registered trademark of BIEC International Inc.) steel, as well as acrylic-coated Galvalume. Custom color matching and specialty paint systems are available upon request. Your sales representative can supply you with additional information on these and our other products.

## CORELINE™ TEXTURED LOW-GLOSS PVDF COLORS

CoreLine brings together the ultra-premium paint system benefits of PVDF like improved color retention, impressive fade characteristics, and brighter colors, while also providing a low-gloss, gritty, textured finish to improve grip retention and walkability.

Typically, textured finishes have only been available for SMP paint systems. With demand already high for low-gloss products, CoreLine finishes will be a welcome addition to customers, blending advantages of both SMP and PVDF paint systems.

### CORELINE 24-GA TEXTURED LOW-GLOSS PVDF COLORS INCLUDE:

- TLG Medium Bronze
- TLG Black
- TLG Charcoal Gray
- TLG Moonstone™
- TLG Dark Bronze

## WHY CHOOSE CORELINE FOR YOUR PROJECT?

### UNMATCHED DURABILITY

With time-tested PVDF paint technology, CoreLine will last for decades without excessive wear.

### SLEEK LOW-GLOSS FINISH

This unique finish knocks down harsh sunlight for a smooth and even appearance.

### TACTICAL GRITTY TEXTURE

Improved walkability and added visual interest benefits contractors and homeowners alike.

# NTM PORTABLE ROLLFORMING MACHINES

We proudly distribute New Tech Machinery (NTM) portable rollforming equipment, which is compatible with Sheffield Metals coils. Our engineering is also performed with NTM profiles.

## ROOF PANEL MACHINES

With NTM's SSQ™ II, SSH™, and SSR™ portable roof panel machines, you can efficiently fabricate the panels you need in your exact desired quantity whenever you need them. These machines can produce multiple profiles for different building applications ranging from residential to commercial.

## WALL PANEL MACHINES

New Tech Machinery manufactures the WAV™ Wall Panel Machine, the industry's only portable WAV profile machine. This machine can produce 16", 12", and 8" WAV-style profiles and comes equipped with the UNIQ® Automatic Control System.

## GUTTER MACHINES

NTM's MACH II™ portable seamless gutter machines can fabricate 5" and 6" K-style gutters that incorporate a bottom bead, an alcoa hook, or a straight back depending on your preference and project. NTM also offers the BG7™, a 7" commercial box-style gutter machine capable of producing two profiles that feature a hook or a straight back.

# ACCESSORIES & COMPONENTS

## CLIPS

We stock a full line of roofing clips for engineered and non-engineered applications. Offerings for New Tech Machinery profiles, as well as a number of other panel machines, are available. Clips come in a variety of gauges in either galvanized or stainless steel.

## UNDERLAYMENTS

We stock the full line of Sharkskin synthetic roof underlayments. Sharkskin offers a variety of premium products that were made by a roofer for roofers. Sharkskin Ultra and Ultra SA are approved underlayments for Sheffield Metals' Weathertight Warranty program.

## FASTENERS & SCREWS

We stock a full line of metal roof and wall system fasteners, including low-profile clip screws, pancake head screws, and self drillers. We also carry Panel-Tite® gasket head fasteners from Triangle Fastener Corporation in 30+ finishes for your exposed fastener roofing projects.

## TOUCH-UP PAINT

We stock PVDF air-dry color matched paint pens and spray paint cans in over 30 colors to help installers touch up minor scratches and exposed cut edges.

## POP RIVETS

We stock #43 stainless steel rivets in mill finish as well as 30+ colors painted to match our metal roofing finishes.

## BUTYL TAPES

We stock several widths and lengths of butyl tape. With pressure, it fills voids between Galvalume® and painted metal.

## SEALANTS

We proudly stock NovaFlex Metal Roof Sealant in over 25 colors. NovaFlex is a premium silicone-based sealant designed specifically for metal roofing. NovaFlex is approved for Weathertight Warranties.

## DEKTITES

Dektite® flashers come in nine different sizes for round pipes ranging from 1/4" to 19" in diameter and are stocked in grey EPDM. Special order in 10+ colors to match your roof. Red Brick silicone is available for high temperature applications.

## S-5! ATTACHMENTS

We've partnered with S-5!, the industry leader and innovator, to distribute their attachment systems for snow retention, utility solutions, and solar mounting. S-5! can provide a non-penetrating engineered solution for standing seam metal roofing system accessories.

# S-5! METAL ROOFING ATTACHMENTS

S-5!'s versatile line of aluminum and brass attachment products fit the majority of today's standing seam and exposed-fastened metal roof profiles, including most structural and architectural profiles.

S-5! clamps and brackets have been extensively laboratory tested on a variety of seam types, profiles, and materials to determine ultimate tensile failure loads. The versatility, simple design, strength, and ample size make the S-5! clamps perfect for snow retention solutions, solar solutions, and utility solutions. S-5! Mini clamps are ideal for solar solutions and other common applications.
