NOTCHED PANEL FEATURES

The SSQ II features both squared and profiled notching capabilities

- > Notches are punched before the legs are formed for a clean cut
- > Finished panel has a 1" (25.4 mm) wide strip at each end for hemming
- > Punches are hydraulically-powered and computer-controlled
- > Some snap-seam panels can be made with a profiled flap to be used as a closure
- > Notches can be offset for angled cuts

SQUARED NOTCHING

PROFILED NOTCHING

The SSQ II performs either square or profiled notching depending on the panel profile being produced.

PROFILE INFORMATION

SSQ100 * †	1" high x ½" wide (25.4 wmm x 12.7 mm) mechanically seamed panel. Includes a hand seamer and clip relief. Squared notching available.
SSQ150 * †	1½" high x ½" wide (38.1 mm x 12.7 mm) mechanically seamed panel. Includes a hand seamer and clip relief. Squared notching available.
SSQ200 / 210A *	2" high x ⅜" wide (50.8 mm x 20.6 mm) mechanically seamed and ARMCO panel. Includes clip relief rollers and hand seamer. Squared notching available.
SSQ450 * / 450SL *	1½" high x ¼" wide (38.1 mm x 6.4 mm) snap clip panel / snap-lock panel. Includes clip relief rollers. Squared notching available.
SSQ550 *	1½" high x ⅞" wide (38.1 mm x 11.1 mm) snap lock-panel. The most positive snap engagement available. Includes clip relief. Squared notching available.
SSQ675 *	1¾" high x ⅞" wide (44.5 mm x 11.1 mm) snap-lock panel. Includes clip relief. Profiled notching available.
FFQ100	1" snap seam (25.4 mm) with slotted fastener flange for clipless installation. Includes clip relief rollers and automatic "no chip" rotary slotter. Profiled notching available.
FFQ150	1½" snap seam (38.1 mm) with slotted fastener flange for clipless installation. Includes clip relief rollers and automatic "no chip" rotary slotter. Profiled notching available.
T-Panel	½" to 2" high (12.7 mm to 50.8 mm). Squared notching available.
TRQ250	2½" high x ⅜" wide (63.5 mm x 20.6 mm) mechanically seamed Trapezoid Panel with anti-capillary leg. Includes hand seamer. Squared notching available.
SSQ275 **	2" high x ⅜" wide (50.8 mm x 20.6 mm) snap-lock / mechanically seamed Proprietary Panel System. Includes clip relief rollers and hand seamer. Squared notching available.
FWQ100 / 150	1" or 1½" high (25.4 mm or 38.1 mm) wall / soffit / underdeck panel. Available with optional perforation. Squared notching available.
BBQ750	Board and Batten wall panel with ¾" high x 2" batten.

* Can make T Panel

† Suitable for zinc

All roller systems include shear dies and clip relief rollers.

- SSQ100, SSQ150 and SSQ450/450SL roller systems all use identical left side roller sets.
- FFQ100 and FFQ150 also share identical left side roller sets.
- FWQ100 and FWQ150 also share partial roller sets.

If you purchase or own one of these roller systems, you can add any of the other right side systems at a reduced price!

SPECIALTY PANELS

SSQ275 & flush wall / soffit / underdeck panel profiles

SSQ275 NEW LOCK PROPRIETARY PANEL PROFILE

The proprietary panel system that can be snap-locked and mechanically seamed! The SSQ275 is a 2" tall standing seam panel with strength shown to meet or exceed that of existing profiles. It has optional ASTM and UL testing available, as well as an Installation & Detail Manual (contact NTM for more information). Custom gas or electric seamer also available.

FWQ FLUSH WALL / SOFFIT / UNDERDECK PANEL PROFILE

Produce both roofing and wall soffit panels with the SSQ II Roof Panel Machine! The FWQ profile offers an optional non-powered perforator and hot melt sealant interface. Use it as a wall panel, overhead soffit, or underdeck panel. The underdeck feature can easily be engaged or disengaged, and the reveal feature comes in 0" to 3" in ½" increments (0 mm to 76.2 mm in 12.7 mm increments).

SPECIALTY PANELS

Trapezoidal and board & batten panel profiles

TRQ250 TRAPEZOID PANEL PROFILE

NTM's TRQ250 is a 2.5" mechanically seamed trapezoidal roof panel profile. This profile gets its name from the trapezoidal-shaped pattern of ribs formed at the bottom of the panel. Available for the SSQ II Roof Panel Machine, the trapezoidal panel profile is typically seen on commercial buildings with larger, low-sloped roofs, most often on storage facilities. The TRQ250 features an anti-capillary leg and includes a set of "wide" bead rib rollers.

BOARD & BATTEN WALL PANEL

With New Tech Machinery's board and batten wall panel profile for the SSQ II machine, you'll be able to form board and batten panels without the expense of a standalone machine. It's a must-have if you're looking to add residential siding capabilities to your profile lineup! By using this profile, you'll get the best of both worlds: that distinct board and batten look that your customers want, plus the durability of metal.

A large industrial machine, likely a metal fabricator or welder, is shown in a factory setting. The machine is white and black, with various mechanical components and a control panel. A forklift is visible in the background, and the entire scene is overlaid with a semi-transparent orange filter. A white circular graphic element is in the top left, and a blue circular graphic element is in the bottom left.

UNIQ™

AUTOMATIC CONTROL SYSTEM

Designed with your safety and intuitiveness in mind, allowing you to gain more control of your metal roofing projects with computer automation and functionality directly to your SSQ II machine

STANDARD FEATURES

- > 7" TOUCHSCREEN**
7" touchscreen with lockable metal covers. Includes troubleshooting screens, coil calculator for estimating how much material you have left, job and part entry functions, and machine settings.
- > AUTOMATIC / MANUAL OPERATION**
Automatic or manual operation of your machine and shear control via the touchscreen connection or the manual push-button control panel.
- > EASY CUTLIST IMPORT / EXPORT**
USB port for program updates and to import a 600-panel length cutlist and export of final project specifications.
- > AUTOMATIC NOTCHING (IF EQUIPPED)**
Automatic notch control (if your SSQ II™ MultiPro Roof Panel Machine is equipped for notching) saves you time and labor by programming the types of notches you need and automatically punching the notches as the material goes through the machine, even angled notching for hips, valleys, etc.

The background is a monochromatic orange-tinted photograph of an industrial facility, likely a refinery or chemical plant, showing various pipes, valves, and structural elements. Overlaid on this is a large, solid blue circle in the center-right. To its left is a semi-transparent circle with a white dot pattern. A thick white curved line starts from the top right and arcs around the blue circle.
