Created specifically for all asphalt composition shingle roof systems installations, SHARKSKIN COMP™'s patented design is the most

important step towards an "Integrated Roof System™" in the harsh & abrasive roof environment. A roof system is only as good as its weakest link. SHARKSKIN COMP™ was designed to enhance the life of the roof. Ideally suited for use with all fiberglass based asphalt, modified bitumen based composite roof shingles and under metal roof applications\*. SHARKSKIN COMP™ is an important component when considering long-term moisture protection, durability and ease of installation. Installs with Standard EG Roofing Nails\* and Hammer Tacker Staples\* \*Must be installed per manufactures printed installation labels on each roll.

Created specifically for all metal, slate and batted tile roof installations, SHARKSKIN ULTRA™'s patented design is the most important step

towards an "Integrated Roof System™" in the harsh & abrasive roof environment. A roof system is only as good as its weakest link. SHARKSKIN ULTRA™ was designed to enhance the life of the roof. Ideally suited for use with all metal roof systems, real and synthetic slates, and batted and counter batted concrete tile applications. SHARKSKIN ULTRA™ has no equal when considering long-term moisture protection, durability and ease of installation.

Created specifically for all direct deck applied clay/concrete tile, metal, slate and asphalt shingle roof systems. Sharkskin

Ultra SA™ is designed to protect homes and building from water intrusion due to high wind events such as hurricanes as well as providing secondary protection when the primary roof covering is lost due to hail, tornadoes, hurricanes and earthquakes. No selfadhered roof underlayment on the market provides the design application advantages of Sharkskin Ultra SA™ the only choice as part of a long term roof system warranty.
